

## Project naturalization «I'm citizen of Hamburg!»

The **naturalization project «I'm citizen of Hamburg!»** initiated and piloted by the Turkish Community of Hamburg addressed **to all people from different nationalities** who are interested in applying for naturalization. About **95 project pilots** are hereby **engaged on a voluntary basis** and well trained for this subject matter. **The project pilots come from your communities and advice and assist you in applying for naturalization.**

You would like to be naturalized, **but**

- You have questions on the conditions and advantages of naturalization,
- You have problems when contacting the German authorities,
- The application for naturalization gives you the impression to be very complicated,
- You don't know how and whether you have to be deprived of citizenship,
- You are not certain, if your family can be naturalized at the same time like you.

Our project pilots help you by accompanying you to the authorities, fulfilling the application form with you, checking, if you have all required documents and by asking respective consulates and embassies about denaturalization issues. Briefly, the project pilots are committed to instruct you, iron out prejudices and assist you.

We promote understanding between citizens and authorities and make distinct and direct contact.

Do you need further information or help for your naturalization issue? So contact us!
